Source: These estimated allocations to the states are CRS estimates based on data received from HHS in September 2008; these estimates assume that \$27 million would be allocated for leveraging incentive grants, \$300,000 for training and technical assistance, and about 0.134% of the total to the territories. In addition, the estimates at \$3.2 billion, the amount proposed in the President's budget documents, assume that the entire amount would be distributed as "regular" funds.
